Sizes: 60/ 70/ 77 cm

Technical characteristics

22 mm high pressure laminate (HPL) fibreboard panel on the top and laminated bottom with white compensator.

9 mm varnished solid beech wood strip edging, machined to a large radius to avoid sharp edges.

The metal structure is painted with epoxy-polyester powder paint.

The connecting system is made up of 2 mechanisms that are over one metre apart, which must be activated using a bar to open and close it to make sure children cannot operate it.

The profile of the top is varnished with clear matt water-based self-priming hydroplus varnish for interiors. Non-toxic.

Highly-resistant wheels with locking system, withstanding up to 80 kg.

All fixtures are zinc coated.

Available from size 4 to 6.
